### **Rapid Response Co. launches 360 Response Software for Firefighters Everywhere**

STATEN ISLAND, N.Y. — Rapid Response Corporation has just announced the launching of their innovative app, 360 Response Software. This software is designed to help firefighters around the world when responding to calls.

Powered by Google Maps, 360 Response allows firefighters to have an inside-look on the place they are responding to. With this app, firefighters can know exactly what the building looks like, where the closest hydrant is located, the status of the hydrant and more.

Our 360 Response Software Is Ready To Go To Work Right Out Of The Box

**Locate the right hydrant**  
Our software instantly provides you with the location of the nearest working hydrants & their statuses as well as building & GPS info.

**Fires Burn Faster**  
Today's building materials often result in faster, hotter fires. To do your job you need to respond faster. Our software enables you to do this

**Travels on the Truck**  
360 Response communicates directly with existing CAD systems and will load information automatically to a tablet on your truck.

**Time is of The Essence**  
The bottom line for firefighters is shorten response time. The faster you can get to the scene and start extinguishing the fire, the more lives will be saved.

**ABOUT RAPID RESPONSE CO. :** Founded in 2016, Rapid Response Corporation was created to develop tools to help firefighters save time and lives. Our mission is to use state of the art technology to develop software that supplies first responders with critical information needed when responding to emergencies. Our mission statement: "Save Time, Save Lives."
